Folium Biosciences

Compliance & Certifications

Folium Biosciences is proud to be the world's ONLY hemp company to have been issued a Certificate of Free Sale and a Manufactured Food Establishment License by the Colorado Department of Public Health & Environment (CDPHE).

These licenses help establish Folium Biosciences as the industry's premier hemp company for manufacturing, processing and fulfilling of Folium Biosciences' phytocannabinoid-rich CBD oil, watersoluble technologies and finished food products. Being licensed to operate as a Manufactured Food Establishment gives Folium Biosciences the full capability to legally manufacture food products containing CBD.

The CDPHE conducted a thorough inspection of Folium Biosciences' manufacturing facility, certifying not only the State's legal authorization to engage in the free sale of its products, but certifies 0.0% THC as to the following products:

- Soft Gels
- Pills and Capsules
- Tinctures
- Food Supplements
- Beverages
- Bulk Oil - THC Non-Detectable
- HydroPCR™
- Water Soluble Powders and Liquids
- Non-Detectable THC (Laboratory Results 0.0% Max THC)
Phytocannabinoid CBD Oil and Finished Food products

 Folium Biosciences
Soft Gel Production

Folium Biosciences passed the CDPHE's inspection with a perfect score. We now hold not only all of the State's current food and cosmetic licensing but have obtained through subsidiaries and ancillary companies:

- GMP Certification
- GPP Certification
- Active Pharmaceutical Ingredient (API) licensing
- EU Pharmaceutical Manufacturing licensing
- Kosher and Halal certification
- ISO Certified Clean Rooms for processing and R&D development

Our new extraction and purification facility has also been FDA-registered.

Folium Biosciences now meets all of the health, wellness and food safety criteria, in its zone, that not only food distributors must meet, but we also strive to reach the standards of FDA-approved pharmaceutical manufacturers.
